TIP
You can select a sticky note and hit the pencil (paste) to sketch (use to start drawing)

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

⏱ 20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

loss in agricultural threats,civil wars between nations

To seek employment oppurtunities.

In and out migration

To get rid of natural disasters

To free from cultures and religioustic affairs

Prioritize

Proper guidance and security for their living ,proper governance by the government towards the people....

⏱ 25 minutes

Importance

WHAT IS THE IMPORTANT SOLUTION OF migration?... migration crisis , more often due to lack of income and productive resources to ensure sustainable livelihoods.

TIP
Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keyboard.

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

Build empathy

The information you add here should be representative of the observations and research you've done about your users.

. The lowering of the death rate precedes the lowering of the birth rate, and consequently these countries are now undergoing or have undergone a very large population increase.

Many communities have installed facilities which have become useless because predicated on faulty estimates of future population, or they have failed to install facilities where justified by future population.

The rate of industrialization and its effects on population growth is perhaps the most important relationship.

In the solution of any planning problem, the planner either makes an explicit forecast, or makes some implicit assumption about the population for which he is planning.

A common example of such errors is the newly constructed school in an area where the population is aging rather than being replaced by young, child-bearing families.

"Population" includes much more than mere numbers of people.

Tracing the Growth of the Global Community: A Population Forecasting Analysis.

Population forecasting is a method to predict/forecast the future population of an area.

Usually the population at the design period of water supply systems is predicted to find the water demand at that time, as the systems are required to fulfil their purposes till the end of the design period.

This article argues for basic changes in the way population forecasts are made and used in the planning process.

Important initial steps in this reorientation from projections to forecasts are within the current resources and capabilities of planning agencies.

he misuse and uncritical reliance on projections of current trends should end.

. More attention must be devoted to the systematic analysis of factors not considered by today's formal models, and a new generation of research methods and skills must be developed to study the future and planning's ability to shape it.
